

SASKATCHEWAN 

Tree for Life Program

Thank you to everyone who enquired about the #SK Tree for Life program. The response was overwhelming and we hope that funding can be obtained to continue with this program in the future. Please watch our web-site and Facebook page for information about Future Programs.

Those of you who have received trees, please take pictures of your trees as they progress throughout the summer and post them on your favorite social media using #SK Tree for Life. We thank you for your interest in this program and your continued promotion of it and the benefits that planting the trees bring to our watershed.

When fully grown, the 3,000 trees that we distributed to watershed residents will have the capacity to sequester 65 tonnes of carbon a year to help mitigate climate change. The #SK Tree for Life program is looking for your thoughts on climate change. Please complete the survey at the link below to let us know what your opinions on climate change are <https://www.surveymonkey.com/r/ClimateChangeSK>. Completing the survey will enter you into a draw for a \$500 Gift Card.
